Description:

From Library Journal Teacher Jim Ironheart, aptly named, is sent by forces unknown to save chosen people in life-threatening situations. By chance, a young but jaded reporter stumbles onto his missions, and joins him to investigate who is controlling him and why. Shared nightmares begin to point to an extraterrestrial influence, and the pair are forced to confront Ironheart's forgotten past for answers. Koontz (*The Bad Place* , LJ 12/89), a master at maintaining mystery and suspense, weaves themes from earlier novels into this latest thriller. Even if the ending calls to mind DuMaurier and Hitchcock, *Cold Fire* contains all the ingredients--likable characters, nail-biting suspense, and above all, unlimited imagination--that will please Koontz's fans. For all popular

collections. Literary Guild and Doubleday Book Club main selection; Mystery Guild featured alternate; previewed in Prepub Alert, LJ 9/1/90.
