Description:

Evidence-Based Practice of Critical Care, 2nd Edition, presents **objective data and expert guidance on managing critically ill patients in unique question-based chapters that focus on best practices**. Now thoroughly updated by Drs. Clifford S. Deutschman, Patrick J. Neligan, and nearly 200 critical-care experts, this highly regarded title remains the only book of its kind that

provides a comprehensive framework for translating evidence into practice, making it a valuable resource for both residents and practitioners.

- Tap into the expertise of nearly 200 critical-care experts who discuss the wide variety of clinical options in critical care, examine the relevant research, and provide recommendations based on a thorough analysis of available evidence.
2. Think through each question in a logical, efficient manner, using a practical, consistent approach to available management options and guidelines.
 3. Find the information you need quickly with tables that summarize the available literature and recommended clinical approaches.
 4. Navigate a full range of challenges from routine care to complicated and special situations.
-
- Stay up to date with new issues and controversies such as the redefinition of sepsis • changing approaches to fluid administration • immune suppression in sepsis • monitoring the microcirculation • the long-term sequelae of critical illness • minimizing ventilator associated lung injury • the benefits of evidence-based medicine management guidelines • rapid response teams • and more.
2. Benefit from all-new sections covering persistent critical illness and the role of advanced practice nurses and physician assistants in the ICU.
