Description:

Science has never been so easy--or so much fun!

With *The Everything Kids' Science Experiments Book*, all you need to do is gather a few household items and you can recreate dozens of mind-blowing, kid-tested science

experiments. High school science teacher Tom Robinson shows you how to expand your scientific horizons--from biology to chemistry to physics to outer space.

You'll discover answers to questions like:

- Is it possible to blow up a balloon without actually blowing into it?
- What is inside coins?
- Can a magnet ever be "turned off"?
- Do toilets always flush in the same direction?
- Can a swimming pool be cleaned with just the breath of one person?

You won't want to wait for a rainy day or your school's science fair to test these cool experiments for yourself!
